

Senko Frame project presents:

"TEMPORARY DECONSTRUCTIONS"
by Harm van den Dorpel (NL)

Starts the 21st of February from 21-23
last day the 22d of March 2009

Senko Frame presents "Voorlopige Deconstructies".
Which roughly translated from Dutch means "Temporary Deconstructions".

A selection of animated pictures of people, animals and objects shrinking and collapsing.
The animation of these found objects is on the one hand simple and transparent, on the
other hand the work exposes dramatic transformations of decay.

This series was part of the end-exam work of Harm van den Dorpel who graduated at the
Gerrit Rietveld Academie in Amsterdam, 2006.
